Introduction

After resounding success of our 'Smart Teacher' Training Program in phase one, Federation of Indian Chambers of Commerce and Industry (FICCI) and Extramarks is pleased to announce the second phase of our Teacher Training Program, focusing specifically on "**UNDERSTANDING AND IMPLEMENTING NATIONAL EDUCATION POLICY 2020**".

Since the National Education Policy (NEP) of India has been revised after thirty-four years and holds great significance in changing the paradigm of Education, it is imperative that the same is decoded and understood with an approach of practical implementation. NEP clearly highlights key areas like promoting collaboration & creativity, building skill-based competencies through integration of vocational education and promote lifelong learning. The Policy is a huge milestone for the Indian Education system and is based on the pillars of "Access, Equity, Quality, Affordability and Accountability". This policy will help transform India into a vibrant knowledge hub.

The NEP is ambitious and futuristic, but much of its success will depend on how it is executed. There is a need to create awareness about NEP 2020 amongst teachers, students, officials, and other stakeholders. This policy calls for radical changes in classroom lesson delivery plan and also at the administrative level.

Keeping the current scenario in mind, FICCI and EXTRAMARKS - India's leading EdTech company have once again partnered to upscale, up skill and increase capabilities and capacities of Educators. Through these Training modules, we aim to make practical implementation of the policy seamless and curb challenges / roadblocks. The idea of this program is to support the teaching-learning fraternity up -speed the adoption of NEP 2020 and provide a holistic platform to teachers that will help them better understand NEP 2020 and ensure its application in real life classroom scenario instantly.

The program is centered around building new capacities with respect to:

- Decoding NEP 2020 in the simplest format
- Supporting educators to find practical tools and strategies that will ensure easy implementation of NEP in classroom scenario
- Helping teachers identify elements that will help them restructure lesson delivery
- Understanding Assessment platforms to effectively help measure learning effectiveness of students and timely intervention of teachers to bridge learning gaps – as per NEP guidelines
- Equip schools to adopt best practices and share innovative ideas about teaching - learning to build a community for knowledge sharing

The "Smart Teacher" Training program will comprise of high-impact lectures and presentations, discussions and activities that focus on decoding and implementation of NEP 2020. It will also empower educators to better select digital solution(s) for effective adherence to NEP 2020. Teachers through comprehensive training programs will collaborate with diverse set of peers to further enrich their learning and professional network.
